V. 5

SYSTEMATIC INDEX.

GENUS 1. **AGARICUS**, *Linn.* (continued).

Sect. E. *Coprinarii*. Spores black.

Sub-Genus 1. **Panæolus**, *Fr.* Veil interwoven, often deficient, stem polished, rather firm. Pileus somewhat fleshy, without striæ, the margin exceeding the gills. Gills ascending to the top of the cone, variegated, when young somewhat reddish yellow in dry weather. Commonly growing on dung.

* *Pileus* with a gelatinous dissolving cuticle, *viscid*, *shining when dry*.

623.	<i>separatus</i> , <i>Linn.</i>	.	.	623
624.	<i>egregius</i> , <i>Massee</i>	.	.	624
625.	{ <i>scitulus</i> , <i>Massee</i>	.	.	927 <i>b</i>
	{ <i>leucophanes</i> , <i>B. & Br.</i>	.	.	927 <i>a</i>
626.	<i>fimiputris</i> , <i>Bull.</i>	.	.	625

638.	{ <i>trepidus</i> , <i>Pers.</i>	.	.	655 <i>a</i>
	{ <i>hydrophorus</i> , <i>Bull.</i>	.	.	655 <i>b</i>

** *Stem flexuous, pruinose at the apex.*

639.	caudatus, <i>Fr.</i>	.	.	637
640.	pronus, <i>Fr.</i>	.	.	656
641.	{ empyreumaticus, <i>B. & Br.</i>	.	.	657a
	{ disseminatus, <i>Pers.</i>	.	.	657b
642.	atomatus, <i>Fr.</i>	.	.	638
643.	crenatus, <i>Lasch.</i>	.	.	847

GENUS 2. **COPRINUS**, *Fr.* Hymenophore distinct from the stem. Gills membranaceous, at first coherent from pressure, scissile, then dissolving into a black fluid. Trama obsolete. Spores oval, even, black. For the most part growing on dung.

Tribe i. *Pelliculosi*. Gills covered above with a fleshy or membranaceous cuticle, hence the pileus not furrowed along the gills, but torn and revolute.

* **COMATI.** *Volva taking form of a ring. Cuticle of the pileus torn into scales.*

644.	comatus, <i>Fr.</i>	.	.	658
645.	ovatus, <i>Schæff.</i>	.	.	659
646.	sterquilinus, <i>Fr.</i>	.	.	660
647.	oblectus, <i>Bolt.</i>	.	.	661

** **ATRAMENTARI.** *Somewhat ringed (without volva). Pileus spotted with minute innate punctate scales.*

648.	atramentarius, <i>Fr.</i>	.	.	662
649.	soboliferus, <i>Fr.</i>	.	.	848
650.	fuscescens, <i>Fr.</i>	.	.	663
651.	„ var. rimoso-squamosus, <i>C.</i>	.	.	664

* * **PICACEI.** *Universal veil flocculose, at first continuous, then broken in an areolate manner into superficial scales on the pileus.*

652.	picaceus, <i>Bull.</i>	.	.	665
653.	aphthosus, <i>Fr.</i>	.	.	666
654.	flocculosus, <i>D.C.</i>	.	.	667
—	similis, <i>B. & Br.</i>	.	.	—

* * **TOMENTOSI.** *Pileus at first veiled with distinct flocci or a loose evanescent villosity. Ring none.*

655.	exstinctorius, <i>Bull.</i>	.	.	668
—	fimetarius, <i>Linn.</i>	.	.	—
656.	„ var. pullatus, <i>Bolt.</i>	.	.	669
657.	„ var. macrorhizus, <i>Pers.</i>	.	.	670
658.	„ var. cinereus, <i>Schæff.</i>	.	.	671
659.	{ tomentosus, <i>Bull.</i>	.	.	672a
	{ niveus, <i>Pers.</i>	.	.	672b
—	cothurnatus, <i>Godey.</i>	.	.	—

- *** MICACEI. *Pileus covered with evanescent micaceous scales or granules. Ring none.*
- | | | | |
|-----------|----------------------|-------|----------|
| 660. | micaceus, Bull. | . . . | 673 |

| | {filiformis, B. & Br. | . . . | 686b |

- *** HEMEROBII. *Pileus always smooth. No ring.*
- | | | | |
|-------|-----------------|-------|------|
| 675a. | hemerobius, Fr. | . . . | 687a |
|-------|-----------------|-------|------|

- *** Not indigenous.
- | | | | |
|-------|-----------------|-------|------|
| 675b. | platypus, Berk. | . . . | 687b |
|-------|-----------------|-------|------|

- GENUS 3. **HIATULA**, Fr. *Pileus very thin, without pellicle, formed by the junction of the back of the gills, veil-like when expanded and splitting as in delicate Coprini, but not melting. Spores white.*
- | | | | |
|------|------------------|-------|-----|
| 676. | Wynnei, B. & Br. | . . . | 688 |
|------|------------------|-------|-----|

GENUS 4. **BOLBITIUS**, *Fr.* Hymenophore almost distinct. No universal veil, partial veil often obsolete. Gills membranaceous, soft, becoming moist, but not melting, powdered with the falling ovate, even, sub-ferruginous spores.

677.	<i>Boltoni, Pers.</i>	.	.	689
678.	{ <i>vitellinus, Pers.</i>	.	.	928a
		{ <i>rivulosus, B. & Br.</i>	.	928b
679a.	<i>fragilis, Fr.</i>	.	.	720a
679b.	<i>apicalis, Sm.</i>	.	.	720b
680.	<i>titubans, Bull.</i>	.	.	690
681.	<i>tener, Berk.</i>	.	.	691

GENUS 5. **CORTINARIUS**, *Fries.* Veil like a spider's web, distinct from the cuticle of the pileus, superficial. Hymenophore continuous with the stem. Gills persistent, dry, becoming discoloured, powdered with the slowly falling spores. Trama fibrillose. Spores globose or oblong, sometimes apiculate, ochraceous on white paper.

Tribe i. *Phlegmacium*. Partial veil web-like. Pileus equally fleshy, *viscid.* Stem firm, *dry.*

† **CLIDUCHIL.** Partial veil superior, hanging like a ring from the apex of the nearly equal or clavate stem.

* *Gills pallid, then clay coloured.*

682.	<i>triumphans, Fr.</i>	.	.	692
683.	<i>claricolor, Fr.</i>	.	.	693
684.	<i>turmalis, Fr.</i>	.	.	694
685.	<i>crassus, Fr.</i>	.	.	695
686.	<i>balteatus, Fr.</i>	.	.	696
687.	<i>sebaceus, Fr.</i>	.	.	697
688.	<i>lustratus, Fr.</i>	.	.	799

** *Gills violaceous or becoming purple, then cinnamon.*

689.	<i>varius, Schæff.</i>	.	.	698
690.	<i>cyanopus, Secr.</i>	.	.	699
691.	<i>variicolor, Pers.</i>	.	.	700
692.	„ var. <i>nemorensis, Fr.</i>	.	.	863
693.	<i>largus, Fr.</i>	.	.	701
694.	<i>Riederi, Weinm.</i>	.	.	702

*** *Gills yellow, cinnamon, ferruginous (not at first whitish or violet).*

695.	<i>saginus, Fries</i>	.	.	703
696.	<i>russus, Fr.</i>	.	.	751

*** *Gills olivaceous.*

697.	<i>infractus, Fr.</i>	.	.	704
698.	<i>anfractus, Fr.</i>	.	.	705
699, 700.	<i>Berkeleyi, Cooke</i>	.	.	706, 707

†† SCAURI. Bulb depressed or turbinate, *marginate*.
Stem fleshy, fibrous; cortina commonly inferior
from the margin of the bulb. Pileus equally
fleshy. Gills rather sinuate.

* Gills whitish, then clay coloured or pale cinnamon.

701.	multiformis, Fr.	.	.	708
702.	„	var. flavescens, Cooke.	.	709
703.	napus, Fr.	.	.	710
704.	allutus, Fr.	.	.	752
705.	talus, Fr.	.	.	711

** Gills violet, blue, becoming purplish, at length
cinnamon.

706.	glaucopus, Schæff.	.	.	712
707.	calochrous, Pers.	.	.	713
708, 709.	cærulescens, Fr.	.	.	721, 722
710, 711.	purpurascens, Fr.	.	.	723, 724
712.	„	var. subpurpurascens, Batsch.	.	725

*** Gills ferruginous, tawny, or yellow.

713.	dibaphus, Fr.	.	.	
	„	var. xanthophyllus, Cooke.	.	753
714.	turbinatus, Bull.	.	.	714
715.	corrosus, Fr.	.	.	715
716.	fulgens, A. & S.	.	.	716
717.	fulmineus, Fr.	.	.	717
718.	orichalcus, Batsch.	.	.	754

*** Gills olivaceous.

719.	prasinus, Schæff.	.	.	735
720.	atrovirens, Kalch.	.	.	736
721.	scaurus, Fr.	.	.	755
722.	herpeticus, Fr.	.	.	849

††† ELASTICI. Cortina simple, thin, fugacious,
medial or inferior. Stem at first exserted,
rather thin, never marginately bulbous or
peronate, but rigidly elastic, externally some-
what cartilaginous, polished, shining, naked at
the apex, often at length hollow, pileus thin,
often hygrophanous.

* Gills whitish, then clay-coloured or dirty cinnamon.

723.	cumatilis, Fr.	.	.	726
—	serarius, Fr.	.	.	doubtful native
724.	emollitus, Fr.	.	.	727
725.	crystallinus, Fr.	.	.	728
726.	decoloratus, Fr.	.	.	729

** Gills violet, becoming purplish or flesh colour.

727.	decolorans, Pers.	.	.	730
728.	porphyropus, Fr.	.	.	731
729.	croceo-cæruleus, Pers.	.	.	732

* * *Gills pure ochre, tawny, becoming ferruginous.*

730.	coruscans, <i>Fr.</i>	.	.	733
731.	papulosus, <i>Fr.</i>	.	.	718

*** *Gills olivaceous or smoky.*

(No British species.)

Tribe ii. *Myxaciium*. Universal veil glutinous, hence the stem also viscid, scarcely bulbous. Pileus fleshy, rather thin, gills adnate, decurrent.

† COLLINITI. Stem floccosely sheathed, flocci at first covered with gluten.

732.	arvinaceus, <i>Fr.</i>	.	.	737
733.	collinitus, <i>Fr.</i>	.	.	738
734.	„ var. mucosus, <i>Bull.</i>	.	.	739
735.	mucifluus, <i>Fr.</i>	.	.	740
736, 737.	elator, <i>Fr.</i>	.	.	741, 742
738.	grallipes, <i>Fr.</i>	.	.	734
739.	livido-ochraceus, <i>Berk.</i>	.	.	767

†† DELIBUTI. Veil entirely viscid, hence the stem not floccosely sheathed, but varnished when dry.

* *Gills whitish, then clay-coloured.*

(No British species.)

** *Gills at first violet, blue, or reddish.*

740.	salor, <i>Fr.</i>	.	.	768
741.	delibutus, <i>Fr.</i>	.	.	743
—	illibatus, <i>Fr.</i>	.	.	—

* * *Gills at first ochraceous or cinnamon.*

742.	stillatitius, <i>Fr.</i>	.	.	831
743.	vibratilis, <i>Fr.</i>	.	.	744
744.	pluvius, <i>Fr.</i>	.	.	769

Tribe iii. *Inoloma*. Pileus equally fleshy, dry, at first silky, with innate fibrils or scales, flesh continuous, not hygrophanous. Veil simple, stem fleshy, somewhat bulbous.

* *Gills at first white or pallid.*

745.	argentatus, <i>Pers.</i>	.	.	745
746.	„ var. pinetorum	.	.	746

** *Gills, with the stem and veil, becoming violet.*

747.	violaceus, <i>Linn.</i>	.	.	770
—	cyanites, <i>Fr.</i>	.	.	—
748.	muricinus, <i>Fr.</i>	.	.	815
749.	alboviolaceus, <i>Pers.</i>	.	.	747
750.	malachius, <i>Fr.</i>	.	.	756
751.	camphoratus, <i>Fr.</i>	.	.	771
—	hircinus, <i>Bolt.</i>	.	.	—

* * Gills or veil cinnamon, red, or ochre.

752.	traganus, <i>Fr.</i>	.	.	757
753.	tophaceus, <i>Fr.</i>	.	.	772
754.	„ var. redimitus, <i>Fr.</i>	.	.	773
755, 756.	callisteus, <i>Fr.</i>	.	.	774, 864
757.	Bulliardi, <i>Pers.</i>	.	.	758
758.	vinosus, <i>Cooke</i>	.	.	759
759.	bolaris, <i>Pers.</i>	.	.	769

* * Gills or veil dark, dingy, or olive.

760.	pholideus, <i>Fr.</i>	.	.	761
761.	sublanatus, <i>Sow.</i>	.	.	762
—	phrygianus, <i>Fr.</i>	.	.	—
762.	arenatus, <i>Pers.</i>	.	.	763
763.	penicillatus, <i>Fr.</i>	.	.	764

END OF VOL. V.

Tribe iv. *Dermocybe*. Pileus thinly and equally fleshy, at first silky from an innate down, but when full grown becoming smooth, dry, not hygrophanous, flesh when moist watery or coloured, stem equal or attenuated downwards, externally more rigid, elastic, or fragile, internally stuffed or hollow. Veil simple, fibrillose.

* Gills at first whitish or pallid.

764.	ochroleucus, <i>Schæff.</i>	.	.	775
765a.	decumbens, <i>Pers.</i>	.	.	816a

776b.	orellanus, Fr.	.	.	787b
782.	infucatus, Fr.	.	.	781

*** *Becoming olive, veil dirty, pallid, or dingy. Pileus not torn into scales.*

783.	cotoneus, Fr.	.	.	749
784.	subnotatus, Pers.	.	.	832
785.	valgus, Fr.	.	.	750
786.	{raphanoides, Pers.	.	.	833a
	{venetus, Fr.	.	.	833b

Tribe v. *Telamonia*. Pileus moist, hygrophanous, at first smooth, or sprinkled with the whitish superficial fibrils of the veil. Flesh thin throughout, or only abruptly at the margin (not equally attenuated), scissile stem ringed below or peronately scaly from the universal veil, somewhat cortinate at the apex, hence with almost a double veil.

I. PLATYPHYLLI. Gills very broad, rather thick, more or less distant. Stem spongy, or wholly fibrous.

* *Stem and cortina white or whitish.*

804.	gentilis, Fr.	.	.	806
805.	helvelloides, Fr.	.	.	836
806.	rubellus, Cooke	.	.	835

*** Stem becoming dusky, veil dusky or dingy, gills dark.

807.	bovinus, <i>Fr.</i>	.	.	822
808.	nitrosus, <i>Cooke</i>	.	.	837
809.	injucundus, <i>Weinm.</i>	.	.	823
810, 811.	brunneus, <i>Pers.</i>	.	.	854, 868
812.	glandicolor, <i>Fr.</i>	.	.	789
813.	punctatus, <i>Pers.</i>	.	.	855

II. LEPTOPHYLLI. Gills narrow, thin, more or less crowded. Pileus thin. Stem more rigid externally, somewhat cartilaginous, stuffed or hollow, often attenuated downwards.

* Stem whitish, pallid, not floccosely scaly.

814.	triformis, <i>Schæff.</i>	.	.	790
815.	biformis, <i>Fr.</i>	.	.	869

** Stem becoming violet.

816.	perisceles, <i>Fr.</i>	.	.	838
817.	{ flexipes, <i>Pers.</i>	.	.	824a
	{ flabellus, <i>Fr.</i>	.	.	824b

** Stem and pileus tawny, ferruginous.

818.	{ psammocephalus, <i>Bull.</i>	.	.	839a
	{ iliopodius, <i>Bull.</i>	.	.	839b
819.	incisus, <i>Fr.</i>	.	.	807

*** Stem floccosely scaly, and as well as the pileus becoming dusky.

820.	hemitrichus, <i>Fr.</i>	.	.	825
821a.	stemmaus, <i>Fr.</i>	.	.	840a
822.	rigidus, <i>Fr.</i>	.	.	791
823.	paleaceus, <i>Fr.</i>	.	.	826
821b.	Cookei, <i>Quelet</i>	.	.	840b

Tribe vi. *Hydrocybe*. Pileus smooth, or covered with superficial white fibrils, not viscid, but moist when growing, becoming discoloured when dry; flesh very thin or scissile, rarely with a compacter disc. Stem rather rigid, not peronate; cortina thin, fibrillose, rarely collapsed in an irregular ring.

I. FIRMIORES. Pileus rather fleshy, convex or campanulate convex, then expanded, obtuse, or at length gibbous, margin at first incurved. Stem (in most) attenuated upwards.

* Stem white, cortina of the same colour.
